Magnet Safety is essential to void personal injury and property damage. Neodymium magnets are very strong and must be handled with care. Caution must be taken to avoid personal injury against fingers and other body parts when the magnet pulls towards metal objects or other magnets. Neodymium magnets can shatter, break, or peel if dropped or slammed against other magnets. Shattering magnets could result in eye injury and eye protection should be worn. Strong magnetic fields can also damage floppy disks, credit cards, magnetic ID cards, cassette tapes, video tapes, and other magnetic devices. Do not place neodymium magnets near any medical devices, pace makers, hearing aides, or similar magnetic devices. Children should not be allowed to handle neodymium magnets as they can be dangerous. Magnets may pose a choking hazard and should never be swallowed or inserted into any part of the body. Neodymium magnets are brittle subject to chipping or cracking. Do not attempt to machine, cut, break, drill or alter in any way. Never burn or allow a neodymium magnet to exceed temperatures of 175 degrees Fahrenheit or 80 Celsius. Burning will create toxic fumes.
